

SubseaPartner

SubseaPartner AS – Quality Policy

SubseaPartner AS will provide the best possible quality in all manned and unmanned subsea operations using any of the following; vessels, ROV's, diving equipment and personnel. We shall perform all assignments in accordance with our customers' requirements and expectations.

SubseaPartner is operating in accordance with the international standard for Quality Management Systems, ISO 9001:2008, and this will ensure that all commitments and operations are performed with a high level of satisfaction both from our clients and stakeholders.

Our Quality Management System will provide us with strong customer focus, leadership, positive personnel involvement, good supplier co-operation and planning and execution of projects. The system gives an overview and control of all integrated processes and activities. Senior Management will review the Quality Management System annually to evaluate possible improvements, and if any should arise the management team will generate appropriate actions.

We aim to provide quality services, achieved with the help of a skilled, positive minded team, good technical equipment and cooperation with our sub-contractors. Our customers can be confident that we deliver to meet their expectations.

Bjørn Brunborg, Managing Director
